PROJECT MANAGER – AFRICA - various locations

B Sc Bldg/ Civil

Amazing opportunity for someone to work in Africa (basically run the business) and over see the local projects as a senior Project Manager.

If you are confident, have experience running projects successfully as a Project Manager with no supervision, this may be for you.

Your responsibilities will include direct liaison with the Client, all financiers, professionals and the contractors to ensure effective delivery of projects which are ongoing. Your ability to see the big picture and any upcoming problems will be of great advantage – we need not only a problem solver, but someone with foresight!! You would obviously need to have had experience working for a major building contractor at some stage in your career.

Projects range from industrial, retail, commercial and some residential – mixed use and individual.

You will have support from SA head office.

For this position our Client offers an attractive expat package and the opportunity to make your own mark on Africa and in the company.
